

# HUMA PRO

## GUARANTEED ANALYSIS

Total Humic Acid (HA) ..... 6.00%\*

Derived from Oxidized Leonardite

## DIRECTIONS FOR USE

For best results, apply **HUMA PRO** at 1 to 3 gallons per acre at regular intervals during the growing season.

**HUMA PRO** can be injected or broadcast sprayed directly onto the turf.

When applied alone as a foliar spray, it is best to dilute with water at a 1:20 ratio.

\* Analysis using the Verploegh & Brandvold method (1990)

Consult your local **HUMA GRO** representative or another turf specialist for specific turf recommendations.

This product is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by turf.

### Conditions of sale:

The information contained on this label is believed to be accurate and reliable. Buyer and user acknowledge and assume all liability resulting from the use of this material. Follow directions carefully. Timing, method of application, weather, crop conditions and other factors are beyond the control of the seller.
